The Four Essential Freedoms of Free Software

Freedom 0: The freedom to run the program as you wish, for any purpose.

Freedom 1: The freedom to study how the program works, and change it so it does your computing as you wish. Access to the source code is a precondition for this.

Freedom 2: The freedom to redistribute copies so you can help your neighbor.

Freedom 3: The freedom to distribute copies of your modified versions to others. By doing this you can give the whole community a chance to benefit from your

METHODS OF NONVIOLENT INTERVENTION
HOW CELL SITE SIMULATORS WORK

Cellphones look for closest cell tower, even when not in use.

A Cell Site Simulators sends out its own signals, mimicking a normal cell tower, and force all phones nearby to connect to it.

After collecting the data, a Cell Site Simulator passes it along to the actual cell tower. Police then store intercepted data and pinpoint cell phones of interest.
Dirtboxes are military surveillance devices that can capture calls, text messages, and other data from hundreds of cellphones simultaneously.

These cell site simulators can be mounted in helicopters or planes, and with this aerial ability can intercept far more data and track mobile users more efficiently than an on-the-ground Stingray.

It is unclear what happens to the "collateral" intercepted data, but documents suggest some departments use programs to collect and sift through data for future investigations and activities.
HOW CELLPHONE EXTRACTION WORKS

Cellphone extraction devices allow police to crack open locked devices and extract past emails, social media messages, time-stamped location data, and even deleted texts.

Police then play with extracted data to generate powerful analyses such as network maps of individuals’ contacts and timelines of individuals’ communications.
- An agreement not to “distribute, disseminate, or otherwise disclose any information” regarding stingray technology “without the prior written approval of the FBI.”
- An agreement not to “in any civil or criminal proceeding, use or provide any information concerning the Harris Corporation wireless collection equipment/technology” without “prior written approval of the FBI.”
- An agreement to “at the request of the FBI, seek dismissal of the case in lieu of using or providing, or allowing others to use or provide, any information concerning the Harris Corporation” stingray technology.

SURVEILLANCE INDUSTRY INDEX

- Type: Company
- Company: Harris
- HQ City: Melbourne
- Office Locations: United States of America
- Technology Sold: Phone Monitoring, Video Surveillance, Equipment, and Intrusion
- Found In: Uzbekistan
- Trade Show: ISS World

Description: Harris makes Phone Monitoring, Video Surveillance, Equipment, and Intrusion technology. Their headquarters is in Melbourne. They have offices in United States of America.

Contact: web.master@harris.com

Company's Documents:
- AmberJack
- StingRay
- KingFish
- StingRay, AmberJack
- Unmanned Surveillance System

Company's Sales:

How many people are locked up in the United States?

The United States locks up more people, per capita, than any other nation. But grappling with why requires us to first consider the many types of correctional facilities and the reasons that 2-3 million people are confined there.
