**I believe there are five
fundamental digital rights:**

The Future of Computing and Why You Should Care

Todd Weaver • Founder & CEO • Purism, SPC

1. Right to Change Providers

If a person wants to change a service provider, they can easily move to another.

(Decentralized Services)

2. Right to Protect Personal Data

A person owns and controls their own master keys to encrypt all data and communication, nobody else.

(User-controlled Encryption)

The Future of Computing and Why You Should Care

Todd Weaver • Founder & CEO • Purism, SPC

3. Right to Verify

Society has the freedom to inspect the source of all software used, and can run it as they wish, for any purpose.

(Software Freedom)

4. Right to be Forgotten

A service provider only stores the minimal personal data necessary to provide the service. Once the data is no longer required, it is deleted.

(Minimal Data Retention)

5. Right to Access

A person must not be discriminated against nor forced to agree to any terms and conditions before accessing a service.

(Personal Liberty)

**We can change the future of
computing for the better.**
